ALI HAROON

Python Web Developer | AI/ML Engineer

aliharoon3381@gmail.com | +92-314-1675299 | Pakistan | github.com/ali-12354

PROFESSIONAL SUMMARY

Passionate Python Web Developer and AI/ML Engineer with expertise in backend development and intelligent systems. Building scalable applications and leveraging AI to solve real-world problems. Pursuing a B.Sc. in Software Engineering with hands-on experience in Django, Flask, REST APIs, and ML model development. Also exploring Cloud Computing and Cyber Security skills.

TECHNICAL SKILLS

Frontend	HTML, CSS, Bootstrap, JavaScript
Backend	Python, Django, Flask, C++
Databases	SQLite, SQL Server, XAMPP
AI & ML	NumPy, Pandas, TensorFlow, Seaborn, Matplotlib, n8n, LangChain, RAG, REST APIs
Tools	Git, GitHub, VS Code

EXPERIENCE

Artificial Intelligence Intern — Code Alpha
Gained hands-on experience in AI development, working on real-world intelligent systems and ML projects under professional mentorship.

EDUCATION

B.Sc. Software Engineering
Superior University, Lahore — Currently in 5th Semester

CERTIFICATIONS & COURSES

Web Development — SoloLearn | AI Using Python — DigiSkills | Freelancing & AI — DigiSkills | Generative AI & Agentic AI Badge — IBM | Networking Basics — Cisco

PROJECTS

Hospital Management System
Full-featured hospital management app with patient records, appointment scheduling, and billing modules.

Flask API Development
Designed and deployed RESTful APIs using Flask for web and mobile applications.

AI-Powered Object Detection System
Real-time object detection using YOLOv8 and OpenCV to identify and track objects in live video streams.

AI-Powered FAQs Website
Django-based AI assistant with three-layer pipeline (rule-based, TF-IDF, semantic search) across 31 categories and 305 advanced AI FAQs.

Phoenix.ai — AI-Powered Phishing & Scam Analysis Agent
Flask app analyzing suspicious URLs, emails, and messages via rule-based detection, ML signals, RAG context, and LLM explanations. Includes ChatGPT-style chat UI, saved history, user auth, API keys, admin dashboard, rate limiting, and webhook support.
